

WHAT IS CLAIMED IS:-

1. An inkjet printer cartridge including:
 - an elongate body housing a printing fluid storage and adapted to be received within an inkjet printer cradle;
 - 5 a pagewidth printhead attached to said body and in fluid communication with said printing fluid storage; and
 - an air distribution assembly arranged to evenly distribute compressed air along the pagewidth printhead.
- 10 2. An inkjet printer cartridge according to claim 1, wherein the air distribution assembly includes:
 - a compressed air inlet;
 - a channel formed in the elongate body in communication with said inlet and disposed along the pagewidth printhead; and
 - 15 a filter sealing the length of the channel and arranged to direct air along its length to said printhead upon air pressure within the channel attaining a threshold level.
3. An inkjet printer cartridge according to claim 1, wherein the filter includes a plurality of pores sized to determine the threshold level.
